

LP Software, Inc. Announces Loves Travel Stops & Country Stores Chooses LP Software as their Incident Management Provider

Oklahoma City Company to utilize LP Software's industry leading Incident Management software to track and manage all their Loss Prevention, Risk Management & Safety incidents

Worth, IL ([PRWEB](#)) April 4, 2011 -- LP Software, Inc, the leader in web-based Incident Management software, today announced that Love's Travel Stops & Country Stores has selected LPMS-Incident Management to track and manage all their Loss Prevention, Risk Management & Safety incidents.

Love's will leverage the LPMS "On-Demand" Software platform to track, manage and prioritize incidents throughout the entire organization, operating in more than 260 travel stop locations and encompassing over 35 states.

"As a client-focused company we are constantly looking for ways to help our clients minimize risk and effectively manage their Loss Prevention & safety issues." says Brian Eskra, CEO of LP Software, Inc. "LP Software's Incident Management Software fills that role perfectly. This is a great platform to offer our clients, and we believe that it will be a crucial tool in helping them strengthen and streamline their Loss Prevention efforts."

LPMS (Loss Prevention Management System) is a software solution designed to reduce LP and Risk Management's time and effort in finding, responding to, and tracking incidents throughout any size organization. LPMS is a web-enabled, centralized incident management solution that empowers management to control the workflow processes necessary to perform their job efficiently and with accountability. This powerful tool will immediately enable LP/Risk personnel to streamline, manage and track incidents of shoplifting, internal theft, restitution payments, customer accidents, and worker's comp cases

"LPMS provides an excellent database where video, audio recordings and any documentation relative to a case can be stored indefinitely which is vital for our Loss Prevention department. Overall it has been an essential tool in performing investigations, as well as building cases and performing robust analytical reports." Says Ryan Smith, Loss Prevention Divisional Manager for Love's.

LP Software, Inc. is committed to the development of best-cost, world-class software solutions that revolutionize the retail and HR mission and contribute greatly to the success of our highly valued customers.
